Subject: Projected work for the remainder of this week

Dave,

We are currently at the Sirinusa site conducting actions to accelerate the venting and dissipation of the Methyl Bromide (above the reference concentration) remaining in Building J Lower, in order to sample the indoor air for clearance purposes.

Ex. 6 - Personal Privacy

Ex. 6 - Personal Privacy

We now have better fidelity on the remaining tasks for this week which includes 24-hour clearance sampling starting this Friday, and tear down/packing of our equipment.

I will be de-mobilizing back to residence, however, ERT will remain to retrieve and ship the air samples to the lab.

V/R

Geoffrey M Garrison
